Table Name	Attribute	Data type	Constraints	Description
users	username	varchar(32)	primary key, unique, not null	unique username of each user
	password_hash	varchar(128)	not null	hash of username+password
	first_name	varchar(32)	not null	first name of user
	last_name	varchar(32)		last name of user
	bio	varchar(250)		user's short biography
	photo_id	int	references photos.photo_id, unique	reference id of photo of user (display picture)
posts	post_id	int	primary key, unique, not null, autoincrement	unique id of each post
	author_username	varchar(32)	references users.username	username of user who posted the post
	content	varchar(250)	not null	text part of post
	time	datetime	not null	time of posting
	photo_id	int	references photos.photo_id	photo of post (if any)
follows	from_username	varchar(32)	primary key, not null, unique,	username of person who follows
	to_username	varchar(32)	references user.username	username of person whom he follows
	since	date	not null	time from when he follows
comments	comment id	int	primary key, unique, not null, autoincrement	unique id of each comment
		-	references users.username, not	,
	author_username	varchar(32)	null	username of user who posted this comment
			references posts.post_id, not	
	post_id	int	null	unique id of post to which comment belongs
	content	varchar(250)	not null	text content of comment
	time	datetime	not null	time of posting of comment
messages	message_id	int	primary key, unique, not null, autoincrement	unique id of each chat
	from_username	varchar(32)	references users.username, not null	username of user who sends message
	to_username	varchar(32)	references users.username, not null	username of user who recieve message
	content	varchar(250)	not null	text content of message
	time	datetime	not null	date of message sent
likes_posts	like id	int	primary key, unique, not null, autoincrement	unique id of the like
				· ·
	from_author post id	varchar(32)	references users.username references posts.posts_id	username of user who liked the post unique id of the post liked
	post_id	IIIC	references posts.posts_iu	unique la ortile post likeu
			naine and Iran designed and add	
dislikes_posts	dislike_id	int	primary key, unique, not null, autoincrement	unique id of the dislike
	from_author	varchar(32)	references users.username	username of user who disliked the post
	post_id	int	references posts.posts_id	unique id of the post disliked
likes_comments			primary key, unique, not null,	
	like_id	int	autoincrement	unique id of the like
	from_author	varchar(32)	references users.username	username of user who liked the comment
	comment id	int	references comments.	unique id of the commont liked
	comment_id	int	comment_id	unique id of the comment liked
dislikes comments	dislike id	int	primary key, unique, not null, autoincrement	unique id of the dislike
	alolike_lu		references users.username	username of user who disliked the comment
dislikes comments	from author	varchar(22)		Tugoritaine of uget who distined the comment
dislikes_comments	from_author	varchar(32)		
dislikes_comments	from_author	varchar(32)	references comments. comment id	unique id of the comment disliked
dislikes_comments	_	,	references comments.	
dislikes_comments	_	,	references comments. comment_id	
dislikes_comments	_	,	references comments.	
	comment_id	int	references comments. comment_id primary key, unique, not null,	unique id of the comment disliked
	comment_id	int	references comments. comment_id primary key, unique, not null, autoincrement	unique id of the comment disliked unique id of each photo stored in database
	comment_id	int	references comments. comment_id primary key, unique, not null, autoincrement	unique id of the comment disliked unique id of each photo stored in database
	comment_id	int	references comments. comment_id primary key, unique, not null, autoincrement not null	unique id of the comment disliked unique id of each photo stored in database
	comment_id photo_id photo_blob	int int blob	references comments. comment_id primary key, unique, not null, autoincrement not null primary key, unique, not null,	unique id of the comment disliked unique id of each photo stored in database binary large object storing photo data
	comment_id photo_id photo_blob donation_id	int int blob	references comments. comment_id primary key, unique, not null, autoincrement not null primary key, unique, not null, autoincrement	unique id of the comment disliked unique id of each photo stored in database binary large object storing photo data unique id of each donation transaction
